# Introduction

This analysis is of tweets from the WeRateDogs twitter account. My analysis revolved around the trend in popularity over time of the account, based off of the number of retweets and favorites, rating distribution, twitter sources, tweet trend and most common dog names.
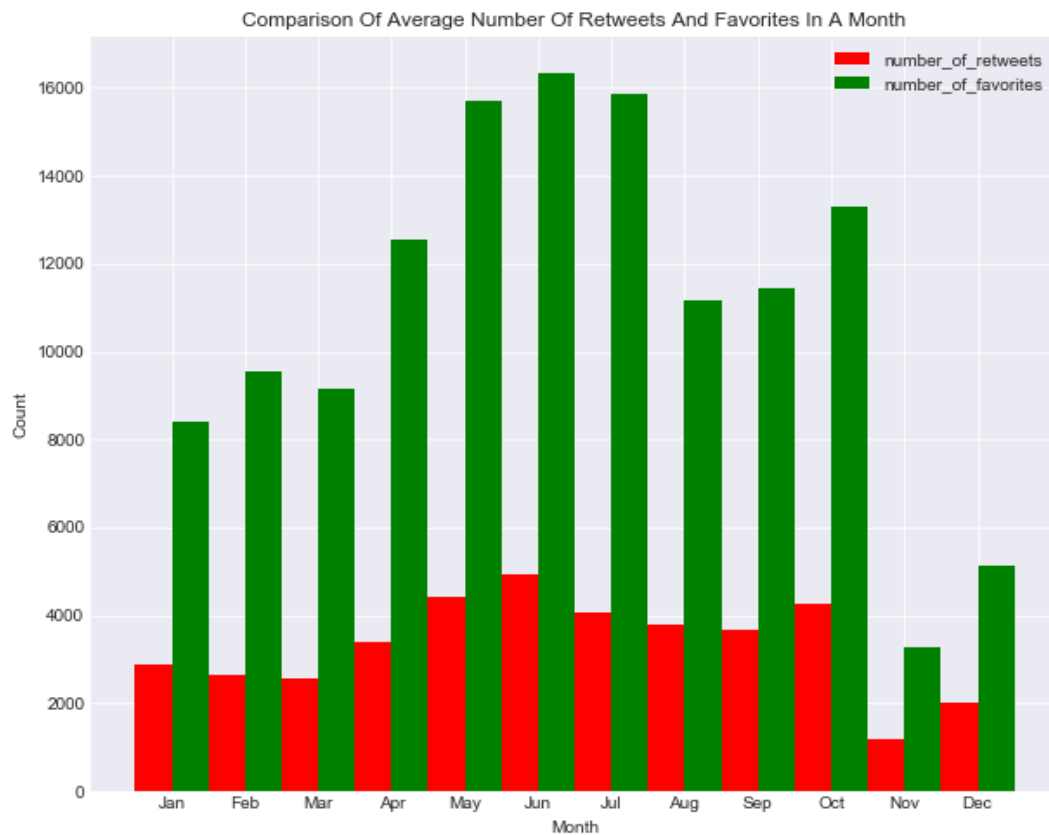

Analysis

WeRateDogs, a Twitter account started in 2015, tweeted a lot in its starting days. For example, it posted around 300 tweets in the month of November 2015, which increased to around 350 tweets in exactly the next month. However, its tweeting activity reduced drastically in the subsequent months, averaging between 50 to 100 since April, 2016
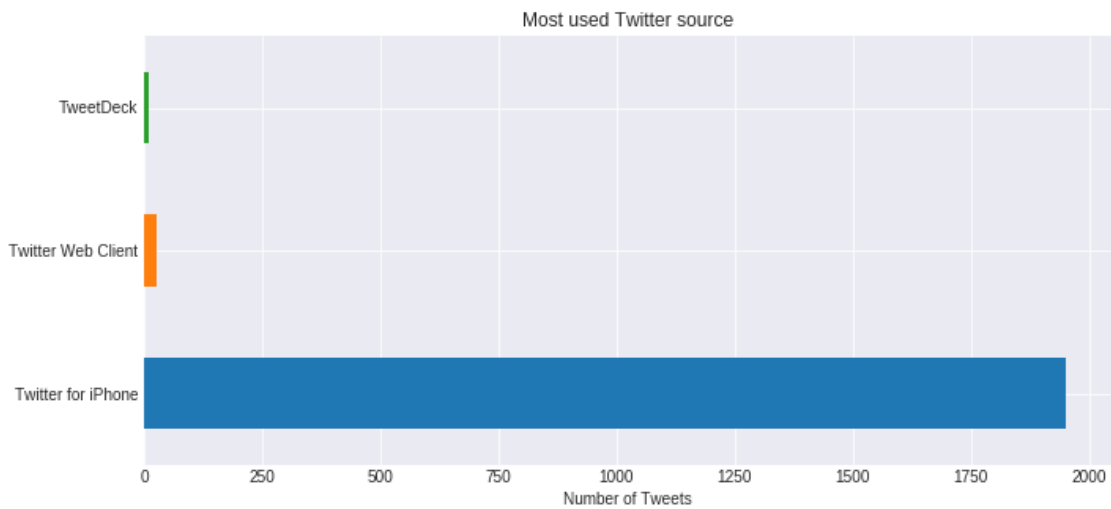

Most of the dogs are rated 12/10 (i.e. 455 out of 1994 dogs). Excluding the 2 rating outliers (420 and 1776), the highest rating received by any dog is 14/10. However, only 2% (i.e. 37) dogs got this rating. So, we can say that WeRateDogs is probably very conservative when it comes to rating a dog the highest.

Dog Rating distribution

On an average number of favorites are quite higher than number of retweets. June has the highest average number of favorites and November has the lowest average number of favorites. May has the highest average number of retweets and November has the lowest average number of retweets. We can conclude that in Nov it is used the least as average is minimum for both retweets and favorites.

Comparison Of Average Number Of Retweets And Favorites In A Month

WeRateDogs has posted 98% of the tweets from iPhone.Out of the 1987 tweets, 1949 were posted from iPhone. Just a confirmation that the only mobile device WeRateDogs uses to post tweets is an iPhone.

Charlie is the most common dog name

11 of the dogs were named Charlie and its the most we have. A close second will be Lucy, Cooper and Oliver, with 10 dogs being named as these.

Top 6 common dog names
